OS: Linux | macOS

Languages:  JavaScript

Web Development :-

 Frameworks/Library:  Angular  VueJS  ReactJS  NextJS

 Package Manger: npm, pnpm

 CSS Preprocessor: SASS

Version Control: 

API Development: REST(openAPI) |  GraphQL

CI/CD: Github Actions | Gitlab CI | Jenkins

Database: 

Design Tools:  Figma  Adbob XD

## About myself

Hey there! This is me an Open Source contributor and maintainer with over 4+ years of experience in the industry, mainly in web development. Love learning, teaching what I've learnt and when I'm doing nothing else I try to create [YouTube videos](#).

## Experience

 **Red Hat**  
July 2019 - Present

### Software Engineer

June 2021 - Present

- Contributed to [SPAShip](#) manger: An open source deployment platform as a service which has improved deployment speed by more than 30 - 45% this saving 500+ hours of deployment time.
- Built a CD pipeline solution using Jenkins to automate SPA (single page applications) depoyments for [One Platform](#) monorepo, with 11+ active applications therefore saving developer time and removing manual deployments.
- Built a [google chat JIRA bot](#) for internal associates to have quick access to JIRA issues, add comments etc, without the process of loggin into the issues portal thus saving time for Red Hat associates.

### Associate Software Engineer

March 2020 - June 2021

- Contributed to [One Platform Component library](#): An open source web components library which helps developers save more than 15% of developer hours and is compatible accross multiple frameworks like Angular, React, VueJS etc.
- Leading DSAL (DevOps savings and loans) an application to loan hardware systems for internal users which effectively saves purchase of new systems by reusing existing hardware systems saving more than thousands of dollars for Red Hat.

### Web Development Intern

July 2019 - March 2020

- Part of an internal AQE (automation and quality engineering team) Helped develop internal portal for application and services like, Outage management, Feedback, FAQs.

 **Liquidice Firestart®**  
omniscent innovations  
Jan 2019 - Feb 2019

### Intern

- Worked on creation of internal tools and created simple REST APIs using Java
- Created endpoints in PHP codeigniter

## Volunteering

 **fedora**  
June 2022 - Present

### Individual contributor

- Creation of a [vue component library known as fp-components](#) for fedora websites and apps team.

 **Gamedoor**  
Sept 2021 - Present

### Maintainer & Contributor

- Leading and maintaining [Gamedoor UI](#), an application built in VueJS
- Optimized build process by using vite for gamedoor UI and setup autodeployments in [Github actions](#)
  - Added automation for unit tests in github actions
- Built a [Vue component library for gamedoor](#)
  - Added vitebook support to view the components
  - Configured tailwind to the component library

## Education

**Nowrosjee Wadia**  
2017 - 2019

### Master of Computer Science

8.1 CGPA
